# WHY DIGA-TALK+?

## CONNECTIVITY

Push-to-Talk over cellular communications equals near instant connectivity with the push of a button.

## CLARITY

Clear, unambiguous communications between dispatch and your mobile workforce to relay concise information.

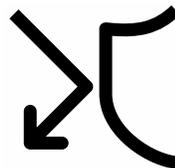

## SECURITY

Eliminates the risk of secure information being intercepted by unauthorized users.

## DURABILITY

Our PTT radio devices are far more durable than conventional cellphones and are designed to withstand harsh environmental use.

## SAFETY

Hands-free compliance for your mobile workforce with the push of a button, creating safer and easier communication.

## Increase Revenue –

Easier communication + improved productivity = Higher Revenues

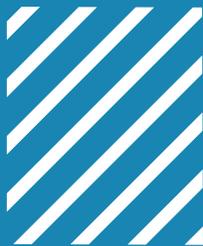

## Improve Efficiencies and

Service – Locate and dispatch your workforce instantly.

**Reduce Costs** – Little to no infrastructure with low cost monthly plans, so no surprise charges.

# WHY DIGA-TALK+?

## ECONOMICAL MOBILE AND PORTABLE PUSH-TO-TALK TWO-WAY POC RADIOS WITH LONG-RANGE COVERAGE

### Stay In Touch with the Push of a Button

Are you looking for an affordable way to communicate locally, statewide or nationally with your mobile workforce? Diga-Talk+ offers unmatched competitively priced two-way digital communication services and devices with nationwide coverage, including in-stock mobile, portable and FirstNet Ready™ devices. Diga-Talk+ is the largest privately owned PTT dealer in the U.S. and offers quality products and has provided outstanding personal customer service for over 30 years.

video

## WHO IS DIGA-TALK+ DESIGNED FOR?

### Price-Sensitive Customers

Easy to use, reliable devices at reasonable prices with a low-cost monthly service plan.

### Customers Seeking Wider Coverage Areas

Perfect for businesses that travel longer distances and need clear, dependable communication with their mobile workforce.

### Customers Requiring Low Start-Up and Operating Costs

No expensive infrastructure required. Let Diga-Talk+ save you money and improve operations with our state-of-the-art two-way radios and services.

# WHY DIGA-TALK+?

## KEY BENEFITS OF USING DIGA-TALK+

### **Nationwide Coverage**

Instant, reliable and affordable nationwide LTE coverage with the push of a button.

### **A Complete Portfolio of PTT Devices**

Diga-Talk+ offers portable and mobile radios that are more durable, and fully programmable, with noise canceling technology for superior sound quality. Every Digi-Talk+ radio is capable of GPS tracking and comes with all the accessories you need. In addition, you can install the Diga-Talk+ software on iOS or Android smart device.

### **Smart Phone Application**

The ultimate Push-To-Talk Application for business and personal use. Allows users to communicate with Diga-Talk+ Push-To-Talk radios by using their smart devices.

### **PC Dispatch Software**

Diga-Talk+ Dispatch Software provides you with complete control of your mobile workforce. You can communicate and monitor individual or team activities as well as make emergency SOS notifications.

### **GPS Tracking**

With Diga-Talk+ optional GPS tracking, you can get complete visibility as to where your field team is located, which provides timely dispatching for any company. This provides efficiencies that allow you to dispatch the closest worker, fit more jobs in each day and make your customers happier.

### **Gateway Interface**

Diga-Talk+ dispatch software has a simple interface to allow you to track your assets and pull the last 12 hours of activity for viewing.

### **Hands-Free Compliant**

With hands-free mobile laws in place across the country, Diga-Talk+ installed mobile radios are the most cost effective way to reduce fines and lower risk to drivers and others with near instant communication with the push of a button.

### **Save Money & Increase Revenue**

Improve efficiencies by locating and dispatching the closest worker with Diga-Talk+. This saves time and gas and allows you to provide expedited customer service to maximize daily workload.

### **Streamline Operations**

Using Diga-Talk+ PC Dispatch Software, you can monitor your workforce's activity. Choose to speak with one person or multiple people at the same time and see their location and receive reports on their activities.

### **Improved Safety**

Improve your team's safety with Diga-Talk+ SOS signal capabilities, instant emergency alert information and real-time GPS location tracking. You can also record radio conversations for quality and safety purposes

### **Solutions for Most Every Industry**

Standard LMR radios have range limitations. This is a disadvantage for a mobile workforce. With Diga-Talk+ you can communicate track, and dispatch throughout the country. For every industry using PTT, Diga-Talk+ has you covered!

### **Outstanding Customer Service**

For over 30 years Diga-Talk+ takes great pride in its superior customer service.

# DEVICES & SOFTWARE

## DIGA-TALK+ NATIONWIDE PUSH-TO-TALK RADIOS AND SERVICE

### **NATIONWIDE COVERAGE**

Near instant Nationwide Push-To-Talk Coverage with 4G LTE.

### **CALL OPTIONS**

One-to-One or One-to-All Group Calling PTT Private and Group Call Playback.

### **PC DISPATCH SOFTWARE AND SMARTPHONE APPS**

Provides complete control of your mobile workforce.

### **GPS TRACKING**

See where your team is, and track where they've been with optional GPS.

## **PORTABLE RADIOS**

**DIGA-TALK+ PORTABLE / HAND-HELD  
PUSH-TO-TALK RADIOS**

Diga-Talk+ portable radios are compact and easy to carry. Users can instantly talk at locations across the country with the push of a button. The antenna allows reliable connection with the 4G LTE network, provided by one of the nation's largest cellular data carriers.

Portable radios are equipped with a rechargeable battery, belt clip and antenna. Models either include charging cradle or USB charging cable.

Portable radios can manage large, diverse fleets. No need for a base radio, FCC licensing or repeaters. Diga-Talk+ portable radios are ideal for communicating with users within a building as well as a mobile workforce at locations throughout the U.S.

# DEVICES & SOFTWARE

## DTP 9750

### Diga-Talk+

Portable 4G LTE -  
Nationwide PTT

The DTP-9750 is the workhorse of the Diga-Talk+ spectrum of offerings. Leveraging the power of LTE, you get private and group calling, on-device recording and playback, GPS tracking, and over-the-air programming. The four quick keys on the front make accessing your favorite group or individual as simple as pushing a button. The 9750 makes for a reliable communications companion that will work for you across the street or across the nation.

#### Functions & Features

- Rugged Radio Design
- Full Color Display
- Fully Programmable
- 4G LTE Secure Network
- PTT Private and Group Call Playback
- Emergency SOS Button
- On-Device Recording
- Over-the-Air Software Updates
- One-to-One or One-to-All Group Calls

#### Options

- Apps Available for iOS and Android
- PC Dispatch Software
- PTT Group Dispatch
- PTT Private Call
- Voice Dispatch and Playback
- GEO Fence
- GPS Tracking with Route; Playback, User Location and Call/Message History

#### Size

2 3/8" W X 6 1/2" H X 1 3/4" D

#### Included Accessories

User's Manual, Antenna, Li-Ion Battery, Belt Clip, Charging Cradle and Cable.

# DEVICES & SOFTWARE

## DTP 9850

### Diga-Talk+

Portable 4G LTE -  
Nationwide PTT

This is the radio that users consistently compare to a “traditional” two-way device. Larger, heavier, and more durable than the DTP-9750, this radio provides access to all that Diga-Talk+ has to offer. Easy access to group and private calling, GPS tracking, and over-the-air programming make this radio a breeze to operate and maintain. The upgraded microphone connector is a plus over the traditional 2-pin and allows you to secure your microphone to the radio. The high-contrast screen makes the device easier to see in the sun and at multiple angles.

#### Functions & Features

- Heavy-Duty Radio Design
- Full Color Display
- Fully Programmable
- 4G LTE Secure Network
- PTT Private and Group Call Playback
- Emergency SOS Button
- On-Device Recording
- Over-the-Air Software Updates
- One-to-One or One-to-All Group Calls

\* Requires activation and service plan.

#### Options

- Apps Available for iOS and Android
- PC Dispatch Software
- PTT Group Dispatch
- PTT Private Call
- Voice Dispatch and Playback
- GEO Fence
- GPS Tracking with Route; Playback, User Location and Call/Message History

#### Size

2 3/8” W x 7 3/8” H x 1 5/8” D

#### Included Accessories

User’s Manual, Antenna, Li-Ion Battery, Belt Clip, Charging Cradle and Cable.

video

## **MOBILE RADIOS**

**DIGA-TALK+ MOBILE / IN-VEHICLE  
PUSH-TO-TALK RADIOS**

Diga-Talk+ mobile radios are ideal for staying in contact with employees when they are on the road. They are safe to use while driving. The antenna allows connection with the 4G LTE network, provided by one of the nation's largest cellular data carriers.

They are designed to be installed in a vehicle. Mobile radio components include the unit, a microphone, antenna, mounting brackets and hardware.

Diga-Talk+ mobile radios can manage large, diverse fleets with the push of a button. No need for a base radio, FCC licensing or repeaters. They are ideal for trucking, snowplows, school buses, private ambulances and highway vehicles where you don't want to worry about losing signals.

# DEVICES & SOFTWARE

## DTP 8700

### Diga-Talk+

Mobile 4G LTE - Nationwide PTT

For those users who have limited mounting options or simply want a smaller radio, the DTP-8700 mobile is the right choice. While small enough to fit in your hand, the DTP-8700 has a high-contrast and rotatable display, making mounting and seeing this device a simple task in any vehicle. Boasting an upgraded module with access to Band 14, the core Diga-Talk+ features such as group and private calling, GPS, and over-the-air programming are available. An external speaker jack, low power consumption, and combined LTE/GPS antenna make this an ideal candidate for mobile operations.

#### Functions & Features

- Compact, Rugged Radio Design
- High-Contrast Display
- Fully Programmable
- 4G LTE Secure Network
- PTT Private and Group Call Playback
- Emergency SOS Button
- Over-the-Air Software Updates
- One-to-One or One-to-All Group Calls

#### Options

- PC Dispatch Software
- PTT Group Dispatch
- PTT Private Call
- Voice Dispatch and Playback
- GEO Fence
- GPS Tracking with Route; Playback, User Location and Call/Message History

#### Size

4 5/8" W x 1 5/8" H x 4 1/4" D

#### Included Accessories

User's Manual, LTE/GPS Antenna, Hand Microphone, Power Cable, Bracket and Hardware.

# DEVICES & SOFTWARE

## DTP 8900

### Diga-Talk+

Mobile 4G LTE - Nationwide PTT

The DTP-8900 is by far our most popular mobile radio model. Access to group and private calling, GPS tracking, on-device audio recording and playback, and over-the-air programming are all available. A large and easy to read display makes this unit easy to operate in a mobile environment. The back of the radio sports a development port as well as a 3.5 mm jack for an external speaker. The development port can be used to interface with many of the popular dispatch consoles. The included antenna can be internally mounted and is combined LTE/GPS, making installation a breeze. All of this coupled with the less than an amp current draw makes the DTP-8900 an ideal mobile device for fleets.

#### Functions & Features

- Compact, Rugged Design
- Full Color Display
- Fully Programmable
- 4G LTE Secure Network
- PTT Private and Group Call Playback
- Emergency SOS Button
- On-Device Recording
- Over-the-Air Software Updates
- One-to-One or One-to-All Group Calls

#### Options

- PC Dispatch Software
- PTT Group Dispatch
- PTT Private Call
- Voice Dispatch and Playback
- GEO Fence
- GPS Tracking with Route; Playback, User Location and Call/Message History

#### Size

7 3/8" W x 2 7/8" H x 5 1/8" D

#### Included Accessories

User's Manual, LTE/GPS Antenna, Hand Microphone, Power Cable, Bracket and Hardware.

# DEVICES & SOFTWARE

## **Across the Street, Across the Country, Digi-Talk+ Has You Covered!**

Diga-Talk+ PC Dispatch Software is an easy-to-use package that gives you complete control of your mobile workforce. You can communicate and monitor individual or team activities as well as make emergency SOS notifications. With the optional GPS tracking, you can get complete visibility as to where your field team is located, which provides timely dispatching for any company. This provides efficiencies that allow you to dispatch the closest worker, fit more jobs in each day and make your customers happier.

The system is based on a multi-functional and visualization dispatching system, featuring one-to-one calling, one-to-all calling, the ability to send short messages, multi-group monitoring, dynamic regrouping and GPS tracking. It can provide a timely dispatching function for any company.

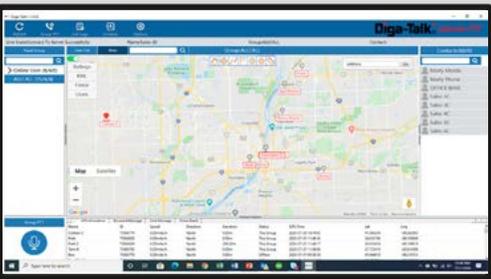

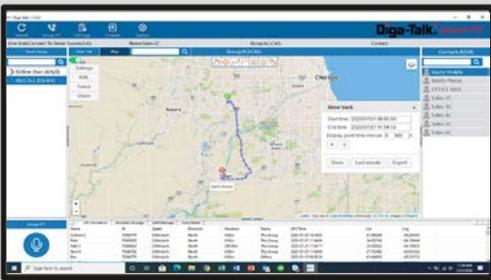

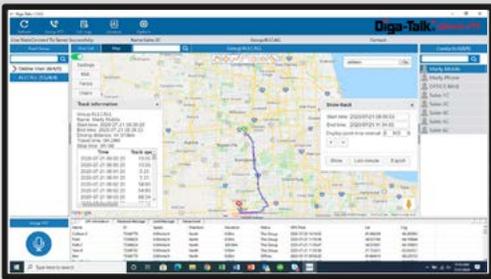

All you need is a PC, a set of speakers, a simple USB microphone and an internet connection.

Simply install the Android or iOS application on your smart devices and pay one low monthly fee to communicate with Push-To-Talk users.

Go to the apps store, search for Diga-Talk+ and install on your smartphone. Contact us at 855-530-2378 to activate your service plan.

### **App Features**

- Push-To-Talk Functionality
- Access to GPS Mapping
- Access to the PC Dispatch Software
- Worldwide PTT functionality

# FIRSTNET

## WHAT IS FIRSTNET?

The 9/11 terrorist attacks brought to the forefront the many communications challenges that first responders face during emergencies and disasters. Public safety organizations and associations advocated before Congress for a dedicated, reliable wireless network for first responders.

Today, in emergencies and at large events, heavy public use can lead to wireless communications networks becoming overloaded and inaccessible. In those instances, public safety users are treated the same as any other commercial or enterprise user, and communications can be limited due to congestion and capacity issues. With the FirstNet Network, public safety gets a dedicated “fast lane” that provides highly secure communications every day and for every emergency.

## DIGA-TALK+ FOR EXTENDED PRIMARY USERS

FirstNet is also available to an extended community that could be called on to help support first responders – from the mitigation, remediation, overhaul, cleanup and restoration to the provisioning of other services required during the time of an emergency or its aftermath. These are known as extended primary users and can include essential government services, education, transportation and utilities. We can help you determine your FirstNet eligibility.

## DTP 9751

**Diga-Talk+**  
Portable Radio  
FirstNet® Ready™

Built on the proven DTP-9750 platform, the DTP-9751 boasts an upgraded module for an improved audio and connective experience. With access to Band 14 your coverage footprint is not only expanded, but the availability of FirstNet comes into play as well. Certified for extended primary users (Schools, Security Companies, Private Ambulance, etc) the DTP-9751 brings all the features users love about Diga-Talk+ into the world of FirstNet.

video

## FIRSTNET SOLUTIONS FOR EXTENDED PRIMARY USERS

# INDUSTRIES SERVED

## ADVANTAGES OF USING DIGA-TALK+ RADIOS FOR YOUR INDUSTRY

Standard LMR radios have range limitations. This is a disadvantage for a mobile workforce. With Diga-Talk+ your customers can communicate, track and dispatch throughout the country.

### Agriculture

Improve communication reliability, which is often lacking on farmland. Save time and energy by utilizing Diga-Talk+ two-way communications. Stay out in the fields while communicating with your crew.

### Airport Support Services

Instant communications where seconds may be critical and cellular networks can be overloaded. The Diga-Talk+ system can group different suppliers and coordinate their activities.

### Amusement Parks

Manage your park employees across the entire property without expensive infrastructure. See the location of all the employees with Diga-Talk+ portable radios. Scalable to any size park and facility.

### Asphalt Contractors

When you're out on the job, instantly contact supplier partners or your office for instructions or changes without having to leave the important job you're on.

### Concrete Contractors

Diga-Talk+ walkie-talkies can help keep instant contact with supplier partners, co-workers and your homebase to receive valuable information about your job and crew.

### Construction

Whether you're up in the rafters or on the ground, it's important to have the ability to communicate with your crew and office for instructions or changes.

### Healthcare

From doctors to nurses to security, it's important to manage security and keep everyone safe and secure. Diga-Talk+ encryption complies with HIPAA information requirements.

### Hospitality

With Diga-Talk+ two-way radios you can coordinate daily activities at the push of a button. Get instant updates from remote employees, including hospitality and maid services.

### HVAC Contractors

If you're in the heating and air business, you know how important it is to quickly communicate with dispatch for directions, parts and instructions.

### Landscaping Contractors

Stay in touch even if your hands are tied up. Diga-Talk+ lapel microphones are available and only have one button to push to make a connection. Don't get stuck in the weeds!

### Municipalities

Diga-Talk+ two-way radio walkie talkies have lower cost to set up, provides better coverage, and requires no maintenance of the sites. See what radios fit your needs.

### Private Ambulance Services

Instantly dispatch or get updates on critical time-sensitive calls. Diga-Talk+ two-way radio walkie-talkie devices can create Common Groups with local hospitals and EMT.

# INDUSTRIES SERVED

## Public Works

Diga-Talk+ radios are the perfect solution to speed up communications, and they are flexible enough to reassign personnel on the fly and help keep everyone safe.

## School Buses

Keep your students safe with fast communications from Diga-Talk+ , with better coverage than cell, GPS tracking, legal to use while driving and no distractions while transporting students.

## Schools

Students are priority No. 1. Plus, using Diga-Talk+ radios is far less expensive than installing repeaters inside a building, and usually provides better coverage.

## Security

Diga-Talk+ is perfect for patrol functions and situations – with the radios rugged devices with secure microphones and GPS for reporting and verification.

## Snow Plowing Contractors

Diga-Talk+ offers low-cost instant communications and tracking when drivers are busy operating plows. Diga-Talk+ radios also have the verification of on the clock and on the site.

## Towing Services

Diga-Talk+ walkie-talkie radios help drivers when they may not know exactly where they are going. You can also track the safety and location of your employees.

## Trucking

Diga-Talk+ provides outstanding coverage nationwide, with virtually no worries about being out of range. Radios are legal to use while driving.

## Utilities

Diga-Talk+ radios are the perfect solution to speed up communications and are flexible enough to reassign personnel on the fly. Learn more about our radios today.

## Warehousing & Logistics

Diga-Talk+ two-way radios are great for large facilities that do not want to spend money on repeaters. Keep employees safe and in touch with one another.

## Waste Management

Diga-Talk+ walkie-talkie two-way radios are the best way to communicate, route completion, route changes, update sales with opportunities and track routes.

# FREQUENTLY ASKED QUESTIONS

**? My current radio system limits my staff on where they can talk and operate clearly. Is this the case with your system?**

Absolutely not! Diga-Talk+ has you covered locally and nationwide. Anywhere your staff goes that has cellular coverage, we can go.

**? Where is this service available?**

We can get you set up no matter where you are in the United States.

**? Is this just an app I'm putting on my employees' phones?**

You have options! You can purchase one of our radio devices, which operates like a traditional two-way radio but with national coverage. Another option – install the software on iOS or Android smart device.

**? Is there a mobile radio available as well as a portable?**

Yes. We offer both form factors for your convenience.

**? It would be convenient if my staff was able to communicate via a PC interface instead of having a radio on desk. Can your system do this?**

We have developed a lightweight dispatching program that every budget can handle. All you need is a PC, a set of speakers, a simple USB microphone and an internet connection.

**? That's great, but what about GPS?**

Every Diga-Talk+ radio is capable of GPS tracking. Our dispatch software has a simple interface to allow you to track your assets AND pull the last 12 hours of activity for viewing.

**? OK, I know you said this isn't a phone app, but does one exist to talk to the radios in the field?**

We currently have an Android and iOS app available to do just that.

**? We have a need to be able to privately call radios without our entire staff listening in. Is this something you can help us with?**

The entire Diga-Talk+ lineup is capable of individual calling if you desire. We can even restrict which radios have it available and which do not.

**? Fantastic! But this is going to cost extra, right?**

Not at all. Private calling and extra talk groups are all included in your monthly fee. You can have up to 10 group radios set up.

**? Are these radios compliant in states with laws against using cellphones while driving?**

The installed mobile device will meet your state's requirements. The portable/handheld devices will not.
